It has never been easier to hand in resignation letters and change jobs as people continue to look for their best viable options and find work in places where they feel they are meeting their fullest potential. In these circumstances, a sales leader must be prepared to explore new innovative leadership styles compatible with the changing times. This is the primary focus of *The Transparent Sales Leader*. In this leadership guidebook, Todd Caponi introduces readers to the revolutionary Five F's Framework -- Focus, Field, Fundamentals, Forecast, and Fun. Caponi does an in-depth analysis of the factors that make a great sales leader. Divided into three parts, the book will help you rethink, break down, and evaluate traditional key performance indicators and work toward fostering and creating an environment that leads to higher performance and lower turnover.

According to Todd Caponi, overpromising and underdelivering is an unsustainable policy, but so is underpromising and overdelivering as it leads to "expectation inflation." Through *The Transparent Sales Leader*, you will learn the Five F's Framework, the difference between transparent leadership and authentic leadership, the role of a sales leader, the benefits of equitability, and much more. Caponi presents the content in an accessible writing style with practically applicable methods and tools using personal anecdotes that provide context to the topic discussed within the relative chapter. This is a helpful book not just for sales managers or people in the sales industry but even readers who are in any way involved in leadership positions in general. Highly recommended.
