When Atlantis fell, it didn't end. Grace Elohim and Archangel Ariel have returned under the directions of the divine with a very tough mission that they must accomplish. They have to gather the lost souls of Atlantis and bring them back to the source so that their journeys are complete. However, this rescue mission is unlike any other and it demands more from these two women than they had anticipated. They have the power and the guidance they need, but the task might be too big for these women to handle. Are their spiritual guidance and power enough to complete this mission?

Marconics: The Clarion Call (Marconics the Human Upgrade) by Alison David Bird and Lisa Wilson is a book that comprehensively explains a very difficult concept. Energy healing is a tough topic to understand, but many people are very much into this and talk about its benefits. Although I am not among the people who have studied or practiced Marconics, I was immersed in this book. I think both the authors did a wonderful job of building and maintaining the interest of readers. This is not an easy concept to teach or describe, but the authors kept their narrative simple, intelligent and easy to read. If they used an uncommon word, they explained it along with any other terminology that a layman is not familiar with. Every complex bit is broken down into several segments to make the reader understand the spiritual healing, while at the same time the authors have succeeded in creating a story that makes the concept even more interesting.
