### Book Review

**Reviewed by Trudi LoPreto for Readers' Favorite**

"The Seneca Scourge" by Carrie Rubin was impossible to put down. The story takes place in a normal hospital but it is told with a touch of science fiction and a hint at romance. Dr. Sydney McKnight is forced to deal with a killer influenza. Dr. Casper Jones is the new virologist at the hospital arriving at the start of the pandemic. The influenza is spreading through the States and reaching across the ocean to Europe and has the ability to kill billions of people. Everyone is affected including nurses that Dr. Sydney works with, small children, teenagers and parents. In fact, the pandemic is touching all walks of life and everyone is frightened they will be the next victim. Sydney begins to think Dr. Casper is hiding something and becomes concerned when she finds him injecting some strange substance into one of the dying patients. She begins to check him out and watches him very carefully. What she discovers is both amazing and scary. How she deals with her discoveries is admirable, dangerous and life changing.

"The Seneca Scourge" is a page turner that will keep you reading late into the night. Carrie Rubin grabs your attention on the first page and keeps it through all of the twists and turns of "The Seneca Scourge". If you enjoy reading medical novels, science fiction novels or just a good thriller, this is the book for you. Carrie Rubin has written a very realistic, believable book with strong characters and plot. I really liked this book and highly recommend it. "The Seneca Scourge" has all the markings of a best seller.
